EXPORT

Our service

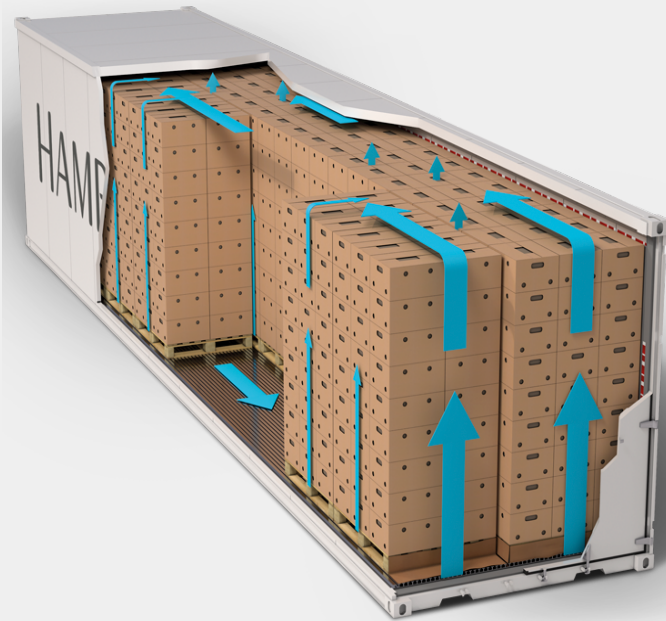

There is no success without you! So you are very important to us as to how important the quality of our raw material is to you which in turn decides your business quality. As a supplier of choice dedicated to do more than just meet requirements, we promise you the in-time delivery and a very delightful service. We completely emphasize on offering pure and hygienically processed range of products at reasonably competitive prices by sourcing raw materials directly from the farm producers thus eliminating cost and middlemen which is beneficial for you, us and the farmers and hence maintaining the competitive edge.

We have experienced and committed talents in our organization who scrutinize the products for the quality and standards before declaring them suitable for export. We keep ourselves updated with the latest technologies, and hence catering to the world's market requirement and providing truly satisfying long-term business relationships to our overseas buyers.

What is a reefer container and how does it work..??

Reefer containers are bottom air delivery units designed to distribute chilled air from the floor, via specific T-shaped decking, with the advantage of producing a consistent and uniform flow of air across the entire shipment, powerful enough to ensure a perfect air exchange with the goods.

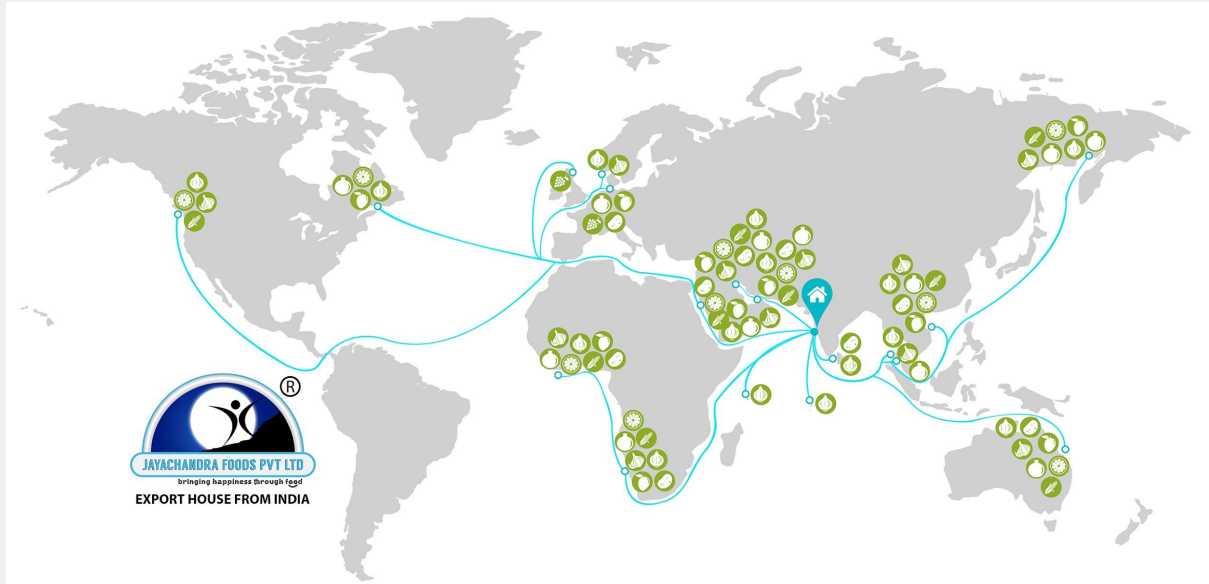

Refrigerated units can maintain or lower the temperature of your shipment, even in the most difficult conditions.

Reefer containers also equipped to 'warm up' the goods for those shipments where required, with the ability to maintain temperatures -30 C to 30°C when required, regardless of outside temperatures.

Important point to note is that a reefer unit is not designed to reduce the temperature of the cargo but rather to maintain the pre-cooled cargo temperature.

Our Client Base

Global Seaborne Commodities Trade

We have a well established market in many Asian countries, African countries, European countries and also doing business in the USA. We provide clear communication to our clients on a regular basis and accord great importance to our corporate relationship, which is based on Ethics and Integrity.
